Did you really mean basewide SI? I cant tell from the AF email transmitting it to you which SI we are talking about but I noticed you said SI(s) in one email.

I have a call into Dave.

I believe the PA identified 4 sites which were then folded into the basewide SI.

Got to run.

I wont be on my laptop today.

Maybe at lunch or later tonight but not during the day.

It is not under BRAC but considered part of the "operating" baser.

I think part of the Rome Labs included part of a hangar but I through that was transferred. Maybe part of it was retained. I believe the hangars had AFFF which was released to the WWT or to TMC.

The SI will need to sample SMC and TMC; however, coordination of the SI (or SIs) between Dave and BRAC and Rome Labs (Operating Area) is necessary.

Bob,

Here is a PFAS PA for Griffiss. It is actually for the AF Rome Labs. Did you receive this?
It is for one area of the base the AF retained.
However, I'm not sure why this area was separate from the rest of the base.
I don't know what would be within the report but if not reviewed we will need to review.

Doug,

I AMRDEC the report. I did not realized that it was small in size (4MB). It's attached to this email. Disregard the AMRDEC notice.

Doug,

It was great talking with you earlier today. I was not able to find the SI for AFRL Rome. However, I did find the PA. I will AMRDEC that one to you. As soon as I get a hold of the SI report, I will do the same.

Take care,

José Hurtado
